Genuine OEM Transmission Oil Pumps

ATP are the exclusive global distributor (except USA) for a wide range of genuine OEM transmission oil pumps to fit a wide range of Backhoe Loaders etc.

The oil pumps are produced in the same plant using exactly the same processes and materials as the OEM parts supplied to off highway manufacturers.

Delivery is ex-stock for single units with bulk purchases being subject to confirmation on receipt of order, but 4-6 weeks is usual.

With 12 month/unlimited hours warranty for customer peace of mind.

New Torque Converters

ATP distribute a range of new OEM 11" (280mm) diameter torque converters to fit many popular backhoe loaders, telescopic handlers, folk lifts, airport ground equipment and many other applications where an automatic transmission is installed. Models include Case, Caterpillar, Terex, Matbro and Manitou.

These torque converters are supplied with a 12 month/unlimited hours warranty.

Remanufactured Torque Converters

ATP Industries Group is one of Europe's leading torque converter remanufacturers, with a range extending from 280mm to 450mm diameter welded industrial torque converters.

- Off highway applications include Volvo Construction Equipment, JCB, Matbro, Case, Terex and Caterpillar plus many material handling units.
- On receipt each unit follows a stringent inspection, cleaning and strip down process before being rebuilt to the original specification (or better) by ATP's skilled engineering technicians.
- Damaged spigots, output gears, sprag bearings and any other internal parts are replaced, making even the most damaged units salvageable, using custom made parts from ATP's own machining facilities.
- Each unit is reassembled, tested and balanced before shipment.
- ATP are also usually able to turn around VOR requirements within 48 hours to minimise plant down time.
- Product reliability is guaranteed by stringent quality controls and measures which ensure every defect is identified and rectified during the remanufacturing process.

Each remanufactured torque converter is supplied with a 12 month/unlimited hours warranty.

New Oil Coolers

ATP Industries Group distributes a growing range of new OEM quality transmission oil coolers for applications such as JCB, ZF transmissions and Volvo L series wheeled loaders.

ATP recommend that each time the transmission is rebuilt or replaced the oil cooler should be changed as, due to the cooler design, it is impossible to guarantee that all debris is removed from the cooler by simply flushing it through.

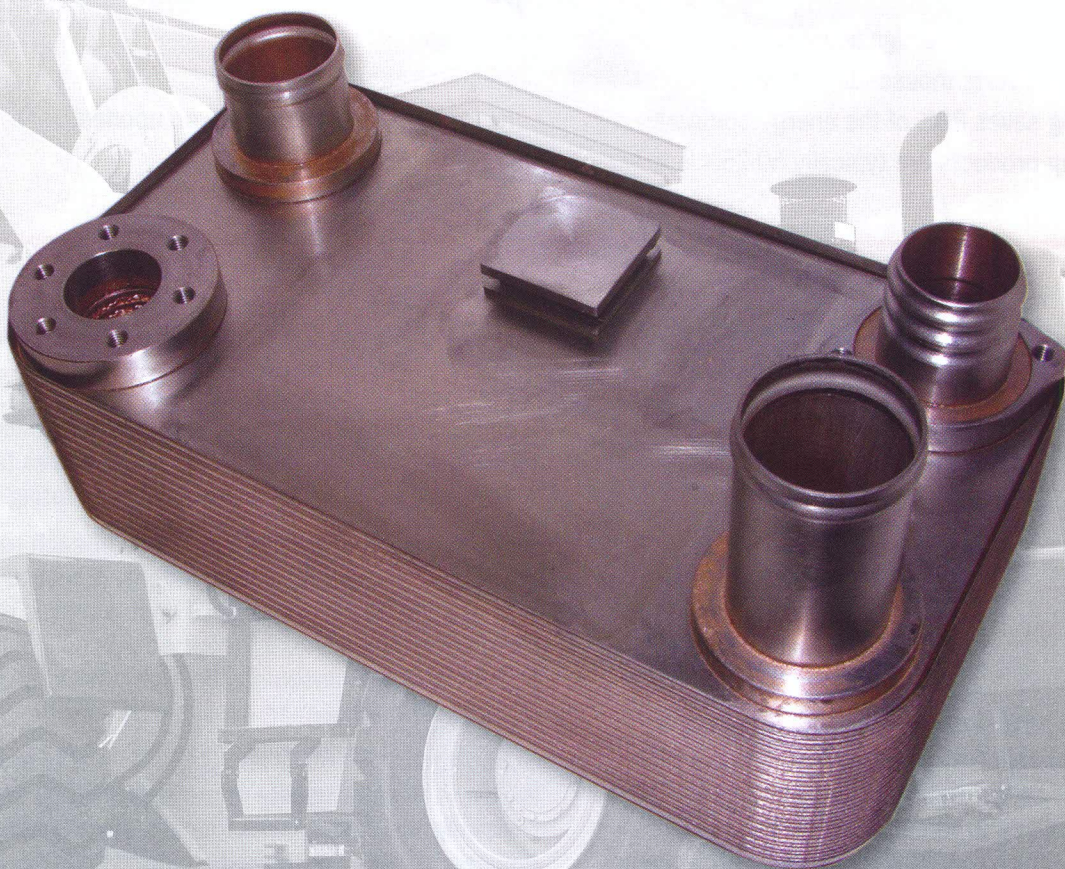

This debris can later result in blocked oil ways and subsequent transmission failure.

The oil to water coolers are manufactured and tested to OEM specification from high grade materials to ensure a durable and reliable product to provide excellent value for money.

Please call for application s and part numbers.

These oil coolers are supplied with a 12 month/unlimited hours warranty.

Delivery to site is usually within 24 hours.
